

Вычисляем правильно

1. Выполни сложение.

$60 + 50 = \square\square\square$

$70 + 50 = \square\square\square$

$80 + 30 = \square\square\square$

$60 + 60 = \square\square\square$

$60 + 70 = \square\square\square$

$70 + 40 = \square\square\square$

$80 + 50 = \square\square\square$

$90 + 90 = \square\square\square$

$60 + 80 = \square\square\square$

$70 + 70 = \square\square\square$

$80 + 70 = \square\square\square$

$80 + 80 = \square\square\square$

$90 + 25 = \square\square\square$

$70 + 65 = \square\square\square$

$80 + 52 = \square\square\square$

$87 + 30 = \square\square\square$

$70 + 46 = \square\square\square$

$80 + 47 = \square\square\square$

$70 + 42 = \square\square\square$

$95 + 20 = \square\square\square$

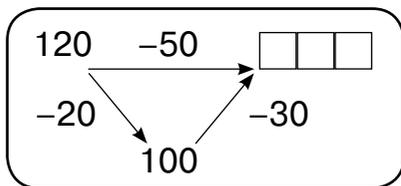

$80 + 32 = \square\square\square$

$90 + 33 = \square\square\square$

$60 + 58 = \square\square\square$

$77 + 40 = \square\square\square$

2. Выполни вычитание.

$120 - 30 = \square\square\square$

$130 - 50 = \square\square\square$

$150 - 60 = \square\square\square$

$140 - 70 = \square\square\square$

$120 - 40 = \square\square\square$

$130 - 80 = \square\square\square$

$150 - 80 = \square\square\square$

$140 - 90 = \square\square\square$

$120 - 70 = \square\square\square$

$130 - 60 = \square\square\square$

$150 - 90 = \square\square\square$

$140 - 50 = \square\square\square$

$160 - 70 = \square\square\square$

$110 - 20 = \square\square\square$

$130 - 40 = \square\square\square$

$120 - 60 = \square\square\square$

$160 - 80 = \square\square\square$

$110 - 50 = \square\square\square$

$130 - 70 = \square\square\square$

$120 - 80 = \square\square\square$

$160 - 90 = \square\square\square$

$110 - 30 = \square\square\square$

$130 - 90 = \square\square\square$

$120 - 90 = \square\square\square$

3. Найди неизвестное слагаемое.

$70 + \square\square = 150$

$80 + \square\square = 140$

$70 + \square\square = 130$

$90 + \square\square = 110$

$60 + \square\square = 130$

$90 + \square\square = 160$

$50 + \square\square = 130$

$90 + \square\square = 140$

$50 + \square\square = 110$

4. Найди неизвестное вычитаемое.

$160 - \square\square = 70$

$130 - \square\square = 90$

$150 - \square\square = 80$

$110 - \square\square = 80$

$120 - \square\square = 80$

$140 - \square\square = 90$

$140 - \square\square = 70$

$110 - \square\square = 70$

$120 - \square\square = 70$
