It seems that there is no place in the world where you cannot find doughnuts. People eat these tasty rings for breakfast, as a snack, or as a dessert, and they can be found in most supermarkets and bakeries.

Doughnuts are typically deep fried, but they can be baked as well. They are usually made from flour, are in the shape of a circle with a hole in the middle, and often have frosting or sugar on the top.

The doughnut as we know it today first appeared in New York, where they were brought by Dutch settlers. These doughnuts were very similar to modern ones, but they were not ring-shaped. The 'doughnut' was first mentioned in 1809.

In the United States people use the word 'school' to refer to everything from kindergarten to university. All children are required by law to go to school until they are 18 years old. However, they have a choice to go to a private school or a public school. Only 11 percent of parents choose to send their children to private schools. This is because fees are often very high. It is estimated that over 50 million children start school for the first time every year. The first year is called kindergarten, followed by elementary school, then middle school, and then finally high school. After kindergarten, students study for 12 years. The school year begins in August and ends in June.
